

Model 0207 Pinch Roller

The Evans Midwest Model 0207 Pinch Roller is a key asset for laminating shops both large and small. The top roller is easily adjustable to the thickness of the work being laminated. Simply insert the provided spacers 1/8", 1/4", and 1/2" to acquire the desired thickness.

Model 0207 is specifically designed to laminate using either contact adhesives or the fast bond PVA's. The Evans Midwest unique design of the pressure roller allows for uniform and even bonding of the laminate to the substrate. The 0207 is an ideal machine when running material with a build down such as counter tops. Compare the features and performance. You too will make the same choice professionals all over the world have been making for over 40 years. Evans Midwest is still the number one choice.

- Bonds at 50 feet per minute
- Safety gates on in-feed and out-feed sides
- Fast, accurate thickness adjustment
- Works with contact adhesive and PVA (white glue)
- Heavy duty construction
- Easy to adjust bottom segment
